

Integrated Management System Policy in accordance with the requirements of ISO 9001, 14001, ISO 45001, IFS Logistics standard as well as regulations on the transport and storage of organic products

Building the image of a trustworthy partner, meeting the requirements of our Customers and improving the organisation and the ambition to provide top quality logistics services with continuous care of the safety of food, safety and protection of employees and the environment were the basis for the decision to implement IMS in domestic and international distribution as well as in contract logistics services in the controlled temperature.

In order to maintain the leading position among similar companies, we hereby declare to operate according to the requirements of the above-mentioned standards, legal regulations as well as other requirements and obligations.

We declare to continuous improvement of the functioning of the IMS and its processes by constantly raising, the awareness of employees, contractors, partners and subcontractors in the area of quality, food safety, health and safety and environmental Impact.

We build the competitive advantage of our clients through:

- increasing the cost-effectiveness of processes
- friendly service
- offering services of the the highest quality

We provide food-safety through:

- maintain limit values defined for critical points during the process of our services provision in order to secure food safety
- establishment and maintenance of Business Continuity Management system (BCM) as an integral element of business activity

We limit the impact on the environment through:

- introducing environmentally-friendly technical solutions
- managing waste in a rational way.
- reducing fumes emission by selecting the carriers, who use more environment-friendly equipment.
- acting effectively in emergency situations, which involve environmental hazards

We increase the safety of our employees, drivers and contractors through:

- identifying and eliminating hazard affecting safety and health, and reducing health and safety risks
- preventing injuries, near-misses, accidents and occupational diseases by minimizing occupational risk
- consulting and participation of employees/ employee representatives in improving the occupational health and safety management system
- building a pro-active safety culture

Our Policy has been declared and presented to the Personnel, Partners, Suppliers and other Stakeholders.
