defined delivery times to distribution centres agreed with retail chains

COMPREHENSIVE INTERNATIONAL DISTRIBUTION SERVICE

including membership in the European Food Network

LEAN CULTURE - LOOKING FOR VALUE FOR THE CUSTOMER AT EVERY STAGE OF THE PROCESS

PAPERLESS LOGISTICS

OUR INNOVATIONS

ORDER-2-CASH, I.E. FROM ORDER TO PAYMENT ONLY ELECTRONICALLY

In the era of digitalization and automation, the speed of information flow is crucial regardless of the industry or size of the company. Growing market demands cause that the electronic data interchange between individual links in the supply chain is no longer just a good practice but a standard. That is why Fresh Logistics Polska and GS1 Polska have taken actions aimed at building awareness and popularization of process standardization through implementation and promotion of the Order-2-Cash solution which consists in digitalization of each stage of the logistics process. The Order-2-Cash solution aims to eliminate traditional paper documents and shift to Electronic Data Interchange (EDI).

THE O2C SOLUTIONS CONSISTS OF THE FOLLOWING ELEMENTS:

1. Standard electronic commercial documents

- EDI messages
- order (ORDERS)
- delivery notification (DESADV)
- confirmation of delivery (RECADV)
- invoice (INVOICE), automatic payment, booking of payments.

2. GS1 Logistic label – the SSCC number included in it is the link between the information sent electronically and the physical flow of goods.

PROCESS BENEFITS

Digitisation of each stage of the process from order to payment ensures:

- speed – more efficient processing of transactions and shorter lead times
- accuracy – reducing human intervention and manual data input, which translates into fewer delivery errors
- thanks to the GS1 standards, electronic documents are closely correlated with the physical flow of goods
- the consignee receives complete delivery information in advance thanks to electronic advice (DESADV message)
- quick and efficient process of goods receipt, thanks to the GS1 logistics label with the SSCC number
- automatic replenishment of product availability on the store shelf and stock optimization.

ECONOMIC BENEFITS

- time savings thanks to eliminating manual entry of transaction data (e.g. orders into the system)
- lower costs thanks to using fewer human resources, eliminating errors and shortening the time of ordering and delivery processes
- elimination of costs related to the handling paper invoices, related to their issuance, printing, dispatch or archiving.

Did you know that ... Jarosław Gulowaty, Contract Logistics Director at Fresh Logistics Polska **became the Chairman of the Council of GS1 Poland for 2020-2024.**
